Career Objective:

- Dedicated and quick-learning ECE student aspiring to build a career as a Python Developer. Passionate about software development, problem-solving, and backend technologies with the ability to adapt quickly and work effectively in a team-oriented environment.

EDUCATION:

B.Tech (ECE)	Annamacharya Institute of Technology & Sciences, Rajampet	CGPA: 8.97	(2023–Present)
Intermediate (MPC)	Government Junior College, Rajampet	Percentage- 88%	(2021–2023)
SSC	Chinmaya Hari Hara VEM High School, Ellayapalli	GPA: 9.8	(2020–2021)

Technical Skills:

- Programming languages:** Basics of python ,C
- Web Technologies:** HTML ,CSS
- Database & Tools :** SQL ,Git, GitHub ,VS Code

Projects:

- Water Level Detection and Alert System | 2026**
 - Tech Stack:** Arduino UNO, Embedded C, Sensors
 - Developed a smart water monitoring system with real-time level detection and alert mechanisms.
 - Implemented buzzer and LED alerts to prevent water overflow and shortage conditions
- LO Self-Service Knowledge Base Chatbot | 2026**
 - Tech Stack:** Python, Streamlit, FastAPI, SQLite, Gemini AI, ChromaDB
 - Developed an AI-powered chatbot to assist users in resolving common IT support issues through an intelligent knowledge base.
 - Implemented ticket creation and escalation features for unresolved queries, improving support workflow efficiency.
 - Created dashboards to track user interactions, support tickets, and overall service performance.
- Personal Expense Tracker | 2025**
 - Tech Stack:** Python, File Handling
 - Developed a Python-based application to record and manage daily income and expense transactions.
 - Implemented expense categorization and automated monthly summary generation with balance calculations.
 - Designed a menu-driven interface for efficient budget tracking and personal financial management.

Achievements

- Workshops**
 - Successfully completed a hands-on workshop on PCB Design and Development.
 - Participated in and completed a practical workshop on Arduino-Based Prototyping and Tinkering.
- Software & Tools**
 - MATLAB – Signal Processing | Circuit Analysis | System Simulation
 - PCB Design – Schematic Capture | PCB Layout Design | Circuit Design
 - Arduino & Embedded Systems – Programming and Hardware

Certificates:

- Python Certificate** -Achieved a python course completion certificate|Infosys Springboard 2025
- Water Level Detection and Alert System Certificate** – Achieved a certificate for developing a smart water level monitoring system using Arduino UNO with real-time detection and alert mechanisms | 2025

Core Competenties:

- Strong Communication
- Quick learner
- Teamwork
- Logical Thinking
- Time Management
- Positive Mindset
